

# *Managed Services for Access Control and Video Surveillance*

## **Why choose JCT Solutions?**

JCT Solutions is a leading provider of services for monitoring, managing, and supporting your access control and video surveillance solutions.

Rely on JCT Solutions Managed Services and take full advantage of:

- A complete set of services you can adapt to your specific requirements
- 24/7/365 monitoring and support
- Enterprise-class remote management and diagnostic tools
- A highly experienced team of JCT Solutions systems engineers and technicians

*Protecting people and property with network-based access control and video surveillance systems*

## **Access Control**

Access control is the basic first step in security. JCT Solutions implements a wide range of access control solutions for every part of a building—lobbies, elevators, classrooms, tenant office suites, fire panels, and more—and supports them 24/7/365 via performance monitoring from the JCT Solutions Network Operations Center.

- Integrate with surveillance cameras, intercoms, buzzer controls, visitor management, and climate-control systems.
- Deliver different levels of access depending upon a person's function or device (e.g., key cards, visitor badges, facial recognition systems, biometric scanners).
- Make updates and changes through an online portal—get a complete history of building access activity in real time.

## **Video Surveillance**

Video is an essential element of any security solution. The new generation of digital video surveillance solutions have made video surveillance much more useable, valuable, and affordable.

Depending on your needs, JCT Solutions can implement a range of solutions and then support them 24/7/365 via performance monitoring from the JCT Solutions Network Operations Center.

- Get real-time monitoring and the ability to investigate incidents through analysis of recorded footage.
- Stream security video to any mobile or internet-connected device.
- Integrate with your access control system and other security solutions for full situational awareness.
- Ensure cameras and video servers are delivering the performance needed to protect your people and property at all times.

## Working with JCT Solutions

From our fully staffed Network Operations Center, JCT Solutions handles the management of thousands of devices in locations across the country.

JCT Solutions is completely experienced in supporting systems from the leading vendors.

Our technicians and systems engineers can work as a seamless extension of your team, supplementing and extending your internal resources or even reducing/eliminating the need for them.

Rely on our expertise to help you segment and prioritize traffic and achieve the ideal environment for VoIP, video, surveillance, and other bandwidth-intensive applications.

## Why Use JCT Solutions Managed Services?

**The Expertise You Need:** Security technologies are constantly evolving—we make it our business to keep up with the latest innovations so you don't have to.

**More Value for Your Business:** With JCT Solutions handling the day-to-day management and support of your access control and video surveillance solutions, it frees your internal staff to focus on the high-priority projects that deliver value to your business.

**Comprehensive Coverage:** It's a challenge for even the largest organization to provide comprehensive support, 24/7/365. Because we are providing it to a range of customers, take advantage of our economies of scale to get cost-effective support.

**Stop Problems Before They Start:** Through our continuous monitoring and proactive diagnostics, we identify and resolve problems quickly—in many cases before our clients are even aware of them.

**Predictable Budgeting:** Rely on our fixed-fee billing for a predictable and manageable monthly expense.

**Access control and video surveillance are some of the most demanding applications your network will ever see.**

**Rely on JCT Solutions Managed Services to improve your performance, reduce your risk, and help you get more value out of your security investment.**
